Solution: Memorize key relationships:

- $T_{1/2} = \frac{\ln 2}{\lambda}$
- $N(t) = N_0 e^{-\lambda t}$

Practice converting between decay constant and half-life and interpret graphical decay curves to reinforce understanding.

Challenge 3: Understanding Particle Interactions and Conservation Laws

Analysis: Particle physics involves complex interactions with numerous particles and force carriers.

Solution: Focus on the conservation principles and symmetry rules. Use simplified Feynman diagrams to visualize interactions, and memorize basic reaction types.
