Analysis:

This problem introduces the concept of currency risk and hedging strategies. It prompts students to consider how anticipated exchange rate movements impact international investment and pricing

- Calculate potential gains or losses from currency movements.
- Consider hedging options to lock in current rates.

Analysis:

This problem encourages understanding of how international institutions serve as lenders of last resort, provide technical assistance, and foster economic stability. Students explore the differences between the IMF's short-term financial support and the World Bank's focus on long-term development projects.

Solution Approach:

- Describe the functions and objectives of each institution.
- Analyze real-world case studies where these institutions intervened.
- Discuss criticisms and limitations of their roles.

Practical Application:

Knowing how these institutions operate is vital for financial managers engaging in international

projects or advising governments on economic policies.

Problem 3: Risks in Multinational Finance

Scenario:

Identify and explain the main types of risks faced by multinational firms operating across different countries.

Analysis:

This problem emphasizes risk management principles by categorizing risks such as:

- Exchange rate risk
- Political risk
- Credit risk
- Liquidity risk
- Transaction risk

Students learn to analyze how these risks influence strategic decision-making and develop mitigation strategies.

Solution Approach:
