Commonly Asked Objective Questions in EEE: Sample Topics and Examples

Here are some typical question formats and sample problems that illustrate what students can anticipate.

Sample Questions from Core Topics

Electrical Circuits

- Q: In a series R-L circuit connected to an AC source, if the inductance is doubled, the

impedance will:

- a) Remain the same
- b) Double
- c) Increase by a factor of 4
- d) Decrease

Answer: b) Double

Transformers

- Q: The maximum efficiency of a transformer occurs when:

- a) Core losses equal copper losses
- b) Copper losses are zero
- c) Core losses are zero
- d) Copper losses equal core losses

Answer: a) Core losses equal copper losses

Power System

- Q: The primary purpose of a circuit breaker in a power system is:

- a) To increase the voltage
- b) To protect the system from overloads and faults
- c) To convert AC to DC
- d) To step down voltage

Answer: b) To protect the system from overloads and faults

Numerical Example

- Q: Calculate the power factor of a circuit with a resistance of 40Ω and an inductive reactance of 30Ω connected to a 120V, 60Hz source.

Solution:

- Impedance, $Z = \sqrt{R^2 + X_L^2} = \sqrt{(40^2 + 30^2)} = \sqrt{(1600 + 900)} = \sqrt{2500} = 50\Omega$

- Power factor, $\text{pf} = R / Z = 40 / 50 = 0.8$ (lagging)

Resources and Tools for Effective Preparation

To master these objective questions, students should leverage various resources:

- Standard Textbooks: Books by authors like Van Valkenburg, Nagsarkar, and D. P. Kothari provide comprehensive coverage.
- Online Platforms: Websites like GateForum, MadeEasy, and YouTube channels dedicated to EEE.
- Mock Tests: Regularly attempt mock exams to simulate real test conditions.
- Flashcards: For quick revision of formulas and key concepts.

Future Trends and Evolving Patterns in Objective Questions

As the field of electrical engineering advances, so do the patterns of examination questions. Some emerging trends include:

- Application-Based Questions: More emphasis on real-world applications and scenario-based problems.
- Integration of Digital Electronics: Increased focus on logic design and digital systems.
- Emerging Technologies: Questions on renewable energy systems, smart grids, and power electronics are becoming more prevalent.
